Introduction to Loop

◆ What is Loop?

📌 Loop is a collaborative workspace for teams. It's a flexible and versatile way for groups to organize and share content for things like meetings and projects. You can link Loop elements directly into other Microsoft applications such as Teams, Outlook and OneNote.

◆

Loop features:

📌 • Loop components (dynamic elements that update in real-time)
  • Loop pages (lightweight collaborative documents)
  • Loop workspaces (team projects in one place)

Loop benefits:

📌 • Real-time editing
  • Seamless collaboration across various Microsoft applications like Teams, Outlook, Word, and OneNote.
  • Ability to tag people directly e.g. (Kia Owens)
  • You can set tasks for people that link to Microsoft Planner

How do you currently collaborate on documents and projects?

Feel free to add more!
