

AI Agents with M365 Copilot

Workshop for *professional staff*

Introduction

What is an AI Agent?

Etymology

Agent comes from *Agere* (Latin) “to do”; so does *Act*.

- Most GenAI use is confined to a ‘chat’:
 - I say, you say
- AI Agents can **act**
 - I say, you **do**

Define agents with custom information / behaviour

Your own ‘custom’ AIs

Different types of agents

M365-style

Application-integrated

Behind-the-scenes

Agents in Microsoft 365 Copilot

According to Microsoft [1] (emphasis added):

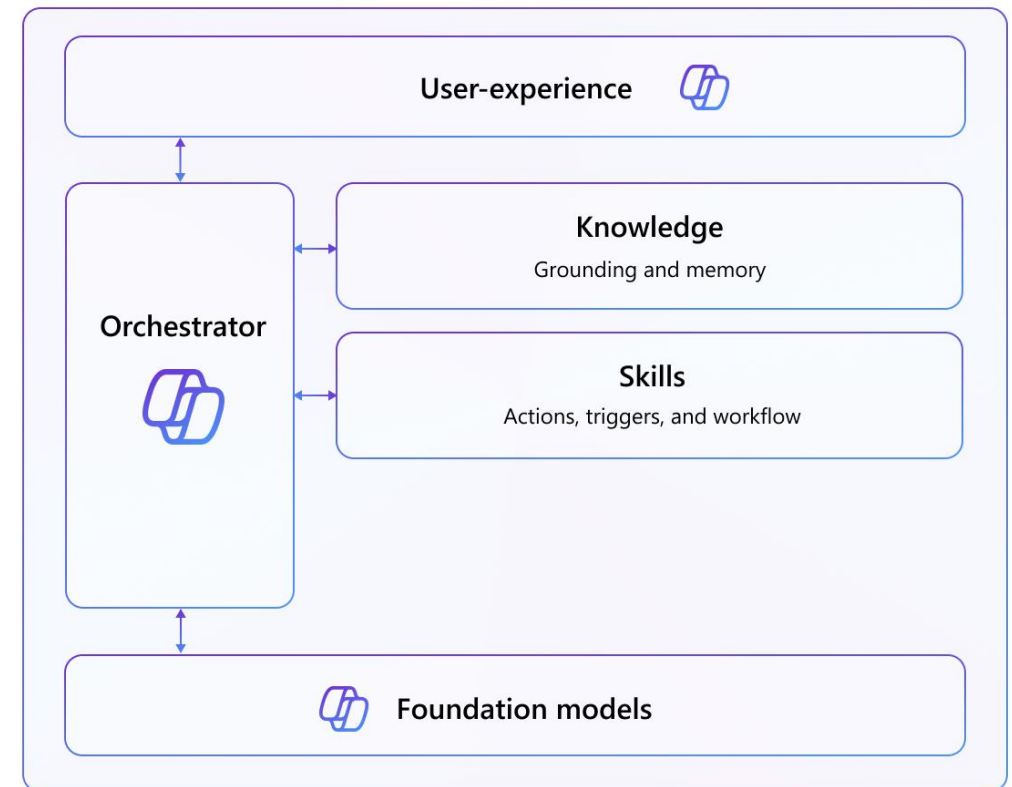

*Agents extend the functionality of Copilot by acting as specialized AI assistants tailored to **specific domains**.*

*These agents **apply organizational knowledge** and automation to streamline business processes, enhance decision making, and improve efficiency.*

*Agents can **retrieve information**, summarize data, or even **take actions** like sending emails or updating records.*

Why M365? We have a licence at UQ.

Anatomy of
Declarative agent

Agents in Microsoft 365 Copilot

What can / can't our M365 agents do?

Can

Chat

Inform agent with specific or all websites

Create

- Images
- Code
- Word/Excel/PPT files

Can't

Read emails or Teams chats

- *Can* access some details about recent emails and collaborators

Integrate with other software

Act proactively / behind-the-scenes

These features *are* available if you upgrade (\$\$\$)

Agents in Microsoft 365 Copilot

Agent Builder Options

Title and description

Don't overlook these – behaviour takes them into account!

Instructions

Provide all details here. Being vague yields a general agent, specific yields a specialised one. Include

- Purpose / object / mission
- Context / relationship to you
- Tone / style
- Rules / guidelines

Model

Auto, Quick response, Think deeper

Knowledge

Draw information from internet? Specific URLs? Only?

- URLs limited to 'two levels deep'
- Can upload files to individual chats *later*

Capabilities

Can create Word / Excel / PPT files, code and images

Suggested prompts

Quick ways to start a chat with this agent

Personal Assistant

Example 1

Building the agent

Start from a prompt

Add your organisation's website as knowledge

Add any other websites you think are relevant

Prompts to try

Here's a report I wrote, can you help me turn it into slides?
Output a PPT presentation.

We're currently launching project [xyz], which we plan to complete by the end of the year. Provide a timeline for when we need to complete each step.

Automation expert

Example 2

Building the agent

This time, try from scratch

Create your own suggested prompts

Prompts to try

I currently do [xyz]. How would I automate this with PowerAutomate?

- Alternatively, try Python

I've received 50 spreadsheets. How can I combine them effectively into one?

Graphic designer

Example 3

Building the agent

From prompt

Prompt to update instructions

Prompts to consider

The following event [xyz] is upcoming. Produce some images I can use on advertising.

Here are my slides for an upcoming talk – what are some images I can use to enhance them?

- Explore the image editor

DIY agent

Your turn!

Come up with an agent that is relevant to you and try create it

Some ideas

- Note taker / summariser
- Presentation coach
- Language tutor

Spend some time, then share your outcomes!
