

GenAI Tools Overview: Uses and Nuances

UQ Library

Acknowledgement of Country

The University of Queensland (UQ) acknowledges the Traditional Owners and their custodianship of the lands on which we meet.

We pay our respects to their Ancestors and their descendants, who continue cultural and spiritual connections to Country.

We recognise their valuable contributions to Australian and global society.

AI Researcher Hub

1. Conception and ideation

2. Execution

3. Dissemination

About this guide

Artificial Intelligence (AI) tools and capabilities are rapidly evolving. Add this technology into your research process thoughtfully to:

- use your time more efficiently
- improve your thinking and problem-solving skills.

Read through this guide to learn about:

- the [principles of responsible AI use](#) in research
- how AI can be applied throughout the research life cycle, including:
 1. [Conception and ideation](#)
 2. [Execution](#)
 3. [Dissemination](#)

AI Teacher Hub

Introducing AI and what students think about it

- What is AI, Gen AI and MT?
- How students use and feel about AI
- AI weaknesses and risks for learning
- Talking with students about AI

> [Read the introduction to AI](#)

UQ's rules for using AI in assessment

- UQ's approach to AI use and academic integrity expectations
- Acknowledging versus referencing AI
- Helping students use AI responsibly in assessment
- AI detection
- Talking to students about AI, assessment and integrity

> [Learn how AI can be used in assessment](#)

Designing and securing assessment

- Assessment design decisions
- What is secure assessment?
- Examples of secure assessment tasks
- Examples of course assessment profiles with secure assessment
- Examples of rubrics for assessment allowing AI

> [Design your assessment with AI in mind](#)

Teaching students to use AI responsibly

- Ethical considerations
- Resources: Discussing AI ethics in your classes
- Resources: Helping students to use AI as a learning tool
- Examples of teaching students about AI limitations

> [Introduce students to the ethics of AI](#)

AI access and training

- UQ AI tools for staff and students
- Training and online resources
- Additional platforms
- Resources: Talking to students about tools and training

> [Discover UQ's tools and resources](#)

Shaping UQ's AI future

- AI seminars and feedback
- Governance and UQ AI networks
- Student engagement
- Have your say

> [Read about the future of AI at UQ](#)

UQ has information and resources for teaching staff regarding Generative AI, centralised in the [AI Teacher Hub](#).

UQ provides **free access** to Microsoft Copilot and Adobe Creative cloud software including Firefly.

Other resources of note

AI referencing guide

Artificial Intelligence Open-textbook

Prompting strategies

Assign a role

- Student
- Academic
- Marketing expert
- Business owner

Provide instructions

- Do Research
- Give me Vivid descriptions
- Advise me
- Help me Brainstorm

Add context

- Target audience or reading level
- Specify the background information relevant to the prompt

Apply constraints

- Define output (dotpoints, list, word limit etc)
- Currency of information e.g. find sources from 2025

Give examples

- Show it what is an acceptable answer
- Give it a starting point

AI and Academic Integrity

At UQ, the use of AI outputs without attribution, and contrary to any prohibition by teaching staff, is a form of plagiarism and constitutes academic misconduct. Check each assessment in your course profiles.

If you use AI in your assessment without permission or appropriate acknowledgment it may be considered misconduct. If you have questions, you should ask your course coordinator.

- Academic integrity and student conduct

Can I use AI in my assessment task?

Acknowledge and reference AI use

- Acknowledge use of any AI tool (publishing form or cover sheet)
- Cite the tool and prompt
- Take note of what you used it for and keep copies of outputs
- If the AI output recommends sources, check these exist and cite these in your reference list if they inform the report, essay or document you are preparing
- Find more information:
 - [Referencing Guide \(Using AI in your Assignments\)](#)
 - [Publishing Guide](#)

Privacy

- AI tools store and learn from your inputs.
- Do not provide personal information to AI platforms.
- Check the privacy policy of the AI:
 - For example: [OpenAI privacy policy](#).
- Do not upload UQ library licensed resources into an AI platform to summarise papers. This is not ethical or responsible behaviour:
 - see [UQ Library Terms of Use](#).

Copyright

Works created through Generative AI tools cannot be copyrighted

The Copyright Act 1968 (Cth) requires that the creator of a work is a qualified person. A qualified person is an Australian citizen or person resident in Australia.

AI Tools & Research

Als available or approved at UQ

MS Copilot

Grammarly

ChatGPT

Claude

- AI chat bots using information scraped from the internet
- Has access to some research information

AI tools from the library guide “Overview of AI tools for literature searching”

Elicit

Scite

SciSpace

Consensus

Keenious

OpenAlex

- Designed with “scholarly information” as a base
- Many use [Semantic Scholar](#) as source
- Relies on RAG (Retrieval Augmented Generation) for information

Uses

Basic LLMs/AI (MS CoPilot, ChatGPT, Claude)

- Generate ideas
- Explain topics

Research discovery based LLMs (SciSpace, Elicit, Consensus)

- Used to discover papers, develop research topics – RAG based retrieval providing results as resource listings
- Chat with collections of papers
- Seed papers as a discovery tool – Research Rabbit, LitMaps

Developing uses

- Deep research tools (OpenAI, Gemini)
- Summarising

Demo/Play time

We encourage you to explore along with us

Using AI tools for:

- Literature searching
- Image analysis/interpretation
- Improving workflow
